Introducing the Next Generation of Helium Recovery!

Quantum Design’s newest helium recovery technology provides:

• 160 and 250 liter capacity dewars (for labs that prefer larger transfers).
• Improved liquefaction rates at 1 PS Ig so helium is ready when you need it.
• Newly-designed purifier that offers same industry-leading performance in a smaller size.
• Optional variable speed compressors that provide energy efficiency and longer life of cold heads.
• New simplified software with intuitive user interface for easier operation.
• Wide range of custom recovery systems available for needs small and large, including direct recovery and recovery systems with medium and high-pressure storage.
